

Pisces Spellchecker

June 2006

Overview

Spellchecking is now available throughout the Pisces application for all editable fields. You will find spellchecking in Pisces works very much the same as in other Windows-based applications (e.g., Word). Spellchecker, however, only works on the text currently visible (e.g., Contract Details) and does not regress through all portions of the contract/project. Moreover, for spellchecker to function, you must be able to edit the visible text. For example, Spellchecker is not available for My Stuff or Explorer.

To show spelling errors or not?

By default, spellchecker is set to show errors (i.e., words not in the Pisces dictionary or your custom dictionary). Figure 1 shows the two types of indicators Pisces uses to alert the user of an unrecognized word when Show Errors is on. For grid areas (e.g., Work Element Title) when you edit a cell, the unrecognized words will be underlined as in other areas of the application. To turn off this feature click the arrow to the right of the spelling icon and click Show Errors (see Figure 2 below).

Work Element Description

The Contractor must submit a draft Annual Report due no later than 30 days after the end of the annual performance period (January 1, 2006 through December 31, 2006). The report shall be submitted to the Principal Investigator, Chris Jordan, at the Northwest Fisheries Science Center, as well as to the BPA Project Manager / **COTR**.

This report will cover the efforts of more than one contract. The Annual Report is to be submitted to the Principal Investigator and a copy sent to the BPA Project Manager. Individual Annual reports are to be consolidated by the PI into a Project Level Annual Report, and only the consolidated report will be posted on the BPA website.

This work element has a deliverable.

Deliverable Title Submit final report to NOAA Principal Investigator and copy BPA Project

Deliverable Specification [Recommended Deliverables](#)

Check spelling one word at a time

You can check words one at a time or all visible text. To proof a single word, ensure Show Errors is enabled then right-click the underlined word. A context dialog box displays as in Figure 3 below. You may select one of the alternative spellings, choose to ignore the error, or select Add to place the word into your personal dictionary. A dictionary with many of the acronyms and words common to the Integrated Fish & Wildlife program will be delivered with Pisces so you won't have to add every unique word individually.

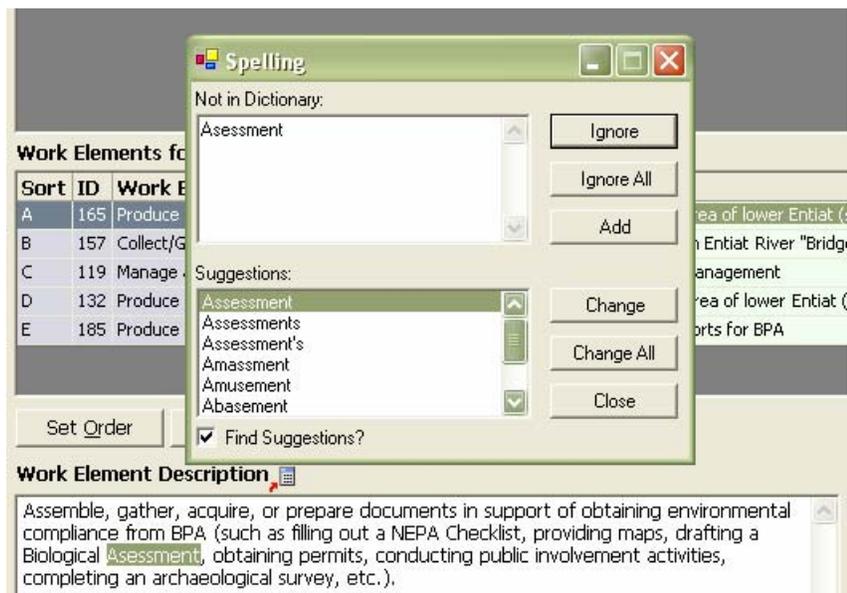

Figure 3

Check spelling of all words

To check all visible text, including grid cells, click the icon, or press the F7 key. A dialog box appears with the first unrecognized word displayed (see Figure 4 below).

Figure 4

To advance the spell check onto the next unrecognized word, click any button (except Close). Clicking Add will place the word into your personal dictionary. This functionality is available irrespective of whether Show Errors is on or off. A dialog box will appear when spellcheck is complete.
